ProCare Product Family

- ProCare 1000
- ProCare 2000
- ProCare 6000

**Michigan's only source for
DUKANE
Healthcare
Communications Solutions**

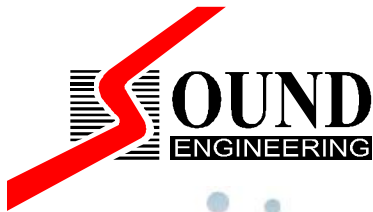

Sound Engineering has the experience you need to select and implement the communications system that is right for your healthcare facility. We can provide systems for facilities ranging from large Hospital Campuses to small Assisted Living Centers.

Recent **ProCare** installations include the William Beaumont Hospital South Hospital Project. This was a 432 bed expansion of the existing facility for which the **Dukane ProCare 6000** was chosen over all other nurse call manufacturers! The **ProCare 6000** product was chosen because of its flexibility and adaptability. This project required an advanced networked system that could provide complete interfacing capabilities with Spectralink™ wireless phones, the hospital's admitting/discharge/transfer system, and provide advanced applications via any computer with browser software.

As Southeast Michigan's and Northwest Ohio's only source for

Dukane Healthcare Communication Solutions,

our trained sales personnel work with you to choose the proper **ProCare System** that fits your specific needs.

IP Communication Systems

vocera[®]
COMMUNICATIONS

Integrators of Advanced Healthcare Communications Systems

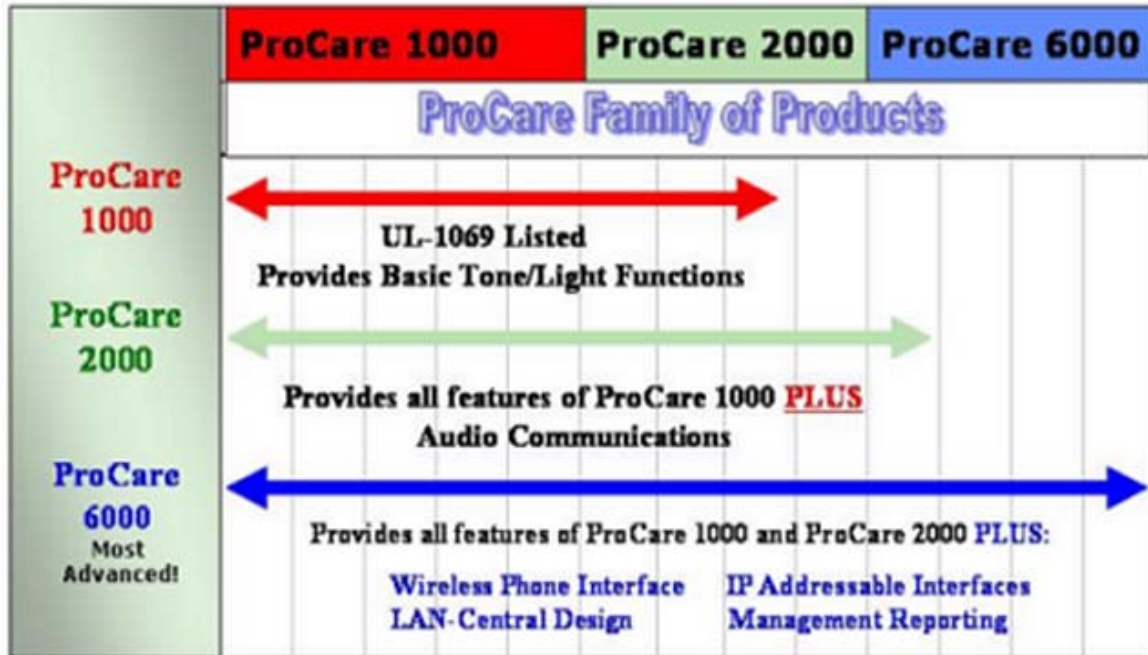

Vocera Communications System enables instant, wireless voice communication that users control with naturally spoken commands. This easy-to-use system is ideal for hospitals where mobile workers need to stay in contact to perform their jobs. A cost-effective tool for increasing staff productivity and customer satisfaction in all kinds of enterprises including hospitals, **Vocera's** use of voice prompts instantly connects users to the people they need, thereby reducing phone tag, overhead paging, or the need to physically search for a person.

SpectraLink

ascom

Netlink h340 Wireless Telephone is uniquely designed to meet the challenging needs of the healthcare workplace. With more durable plastics, backlit keypad, and multiple charging options, this handset is especially suited for 24-hour shift-based environments!

StaffCallPro

Setting a Superior Standard

StaffCallPro is the most flexible fully integrated patient/staff communication system available. Thanks to its comprehensive feature set and ease of use, it is the perfect communication solution for any size of application, and will expand readily with your needs.

AFFORDABLE PERFORMANCE AND EXPANSION CAPABILITY

StaffCallPro is the only patient /staff communication system in the world featuring true stand-alone technology. Each station and substation is an independent unit with all hardware and software built-in. There is no central network server or expensive hardware to add on. That means you can start small and expand – system capacity is virtually unlimited – without sacrificing performance.

THE NETWORK ADVANTAGE

StaffCallPro can be fully networked, a key benefit in today's hi-tech environment. With built-in telephone, wireless phone, pager and PC interfaces, it can be readily integrated into a multi-system network.

MISSION STATEMENT

It is the mission of **Sound Engineering** to be the leader in the sound and video communication industry. Customer satisfaction, quality and diversity of services, system integration, service support and employee contentment defines leadership. Through professional expertise and experienced staff, in concert with high quality products, **Sound Engineering** strives to provide effectively engineered and fully integrated systems for business and institutional needs.
