Wireless Communications

Sound Engineering is proud to have installed telecommunications systems for many businesses and organizations throughout Michigan and Northwest Ohio. Top-quality products offered, such as digital telephone systems by **IWATSU** and **PANASONIC**, integrate the features you need into one, easy to use, telecommunications package.

Telephony

IWATSU
enterpriseNET

IP Solutions

You might have an office down the street, and another across the globe. With Enterprise IP Networking, your main and remote offices can communicate like they're under one roof. Up to 16* separate offices can be networked to communicate with 100% transparency between locations. This transparency means all locations share the same system features and applications centrally located on one main system. That means reduced hardware, software and maintenance costs at individual office locations. So not only does Enterprise IP Networking bridge communication gaps, it's a more hassle-free and costfriendly solution for you!

IWATSU

Digital Solutions

OMEGA-VOICE™

A flexible messaging system for small to medium businesses, Omega-Voice VMI simplifies daily call processing and message management.

OMEGA-VOICE™

- ◆ AUTOMATED CALL PROCESSING
- ◆ MAILBOX MANAGEMENT
- ◆ MESSAGE BROADCASTING
- ◆ MESSAGE NOTIFICATION CALL OUT
- ◆ CALL RECORDING

ADIXAPS

Digital Multiline Display Telephone features 36 programmable multipurpose keys, speakerphone, two-line, sixteen characters per line, liquid crystal display and incoming call indicator lamp. The liquid crystal display is very helpful for using advanced features and for providing status information. The oversized indicator lamp flashes red for incoming calls and green for a programmable feature such as message waiting.

OMEGATREK™

Sound Engineering

is a proud distributor of Omegatrek Wireless Communications System which makes available to your employees full accessibility to communi-

cations for anywhere within the workplace!

Omegatrek can provide more than 1,000,000 sq. ft. of flexible in-building coverage as it operates on base stations located throughout your facility. Wherever your schedule requires you to be, Omegatrek enables you to remain accessible and in-touch.

- ◆ Transfer calls and access voice mail while roaming your facility
- ◆ Program 500 speed dial numbers and multiple ring tones
- ◆ Talk hands-free with an integrated headset jack
- ◆ Get more than 1,000,000 sq. ft. of flexible in-building coverage
- ◆ Support Omegatrek at remote locations from the local end

Voice Mail

Telephony Office-LinX™

enterprise edition

Telephony Office-LinX™ enterprise edition is a real-time communications solution for large enterprise companies. Whether it's a large campus, distributed offices or a mobile workforce, this all-in-one unified communications platform features unified messaging, wireless connectivity, CTI call control, one number Find Me functionality, Web access, instant messaging, speech recognition, text-to-speech for e-mail reading – and even enables callers to connect to you live when you're out of the office!

Telephony Office-LinX enterprise edition lets you retrieve voicemail messages while traveling, record a response, and reply to the message via e-mail. Infrastructure is now greatly reduced, as a single application provides voice, e-mail and fax messages.

MISSION STATEMENT

It is the mission of **Sound Engineering** to be the leader in the sound and video communication industry. Customer satisfaction, quality and diversity of services, system integration, service support and employee contentment defines leadership. Through professional expertise and experienced staff, in concert with high quality products, **Sound Engineering** strives to provide effectively engineered and fully integrated systems for business and institutional needs.
